

**HIGH PERFORMANCE, LOW
COST, POSITIONING SYSTEM
3000 LB. STATIC CAPACITY**

CC Linear Actuators are ball screw linear actuators that provide a high performance and accurate positioning solution. These high-quality actuators feature:

- Durable construction
- Dependable performance
- Long-life operation
- High repeatability
- Operation in either compression or tension loading applications
- Adjustable limit switches
- Lifetime lubrication
- Mechanical overload protection
- Corrosion resistant exterior surfaces

COMMON APPLICATIONS

- Telecommunications
- Architectural Automation
- Medical and Hospital Equipment
- Semiconductor
- Food Processing
- Farm Equipment
- Satellite Dish and Antenna Positioning

STANDARD TRAVELS

4', 12', 18', 24' or 36'

DUTY CYCLE

30%, max "on-time" of 5 minutes
at rated load

TEMPERATURE RATING

Operating temperature range is
-30° F to +160° F

**ENVIRONMENTAL
PROTECTION CLASS**

- IP64

CLUTCH

The CC Linear Actuator gear head offers a heavy-duty clutch that protects the gears and components in the event of overload or overtravel.

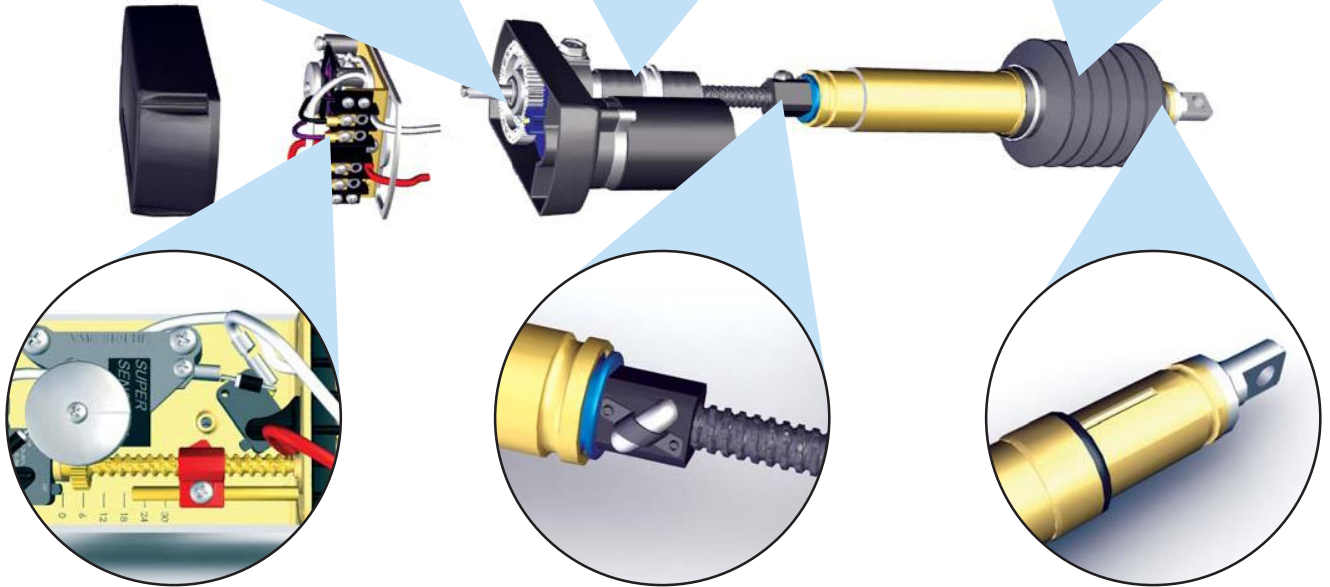

BRAKE

The load sensitive brake maintains the actuator's position when at rest, without consuming power.

BOOT

An optional boot keeps the actuator tube free of contaminants.

LIMIT SWITCH

The screw type limit switch offers precise positioning for travels up to 36 inches. The design of this switch allows the user to easily set limits at both ends of travel.

PRECISION LIMIT SWITCH

An optional precision limit switch is available for travels less than 24 inches. This limit switch offers higher resolution adjustment at setup. Contact Nook Engineering for ordering details.

BALL SCREW

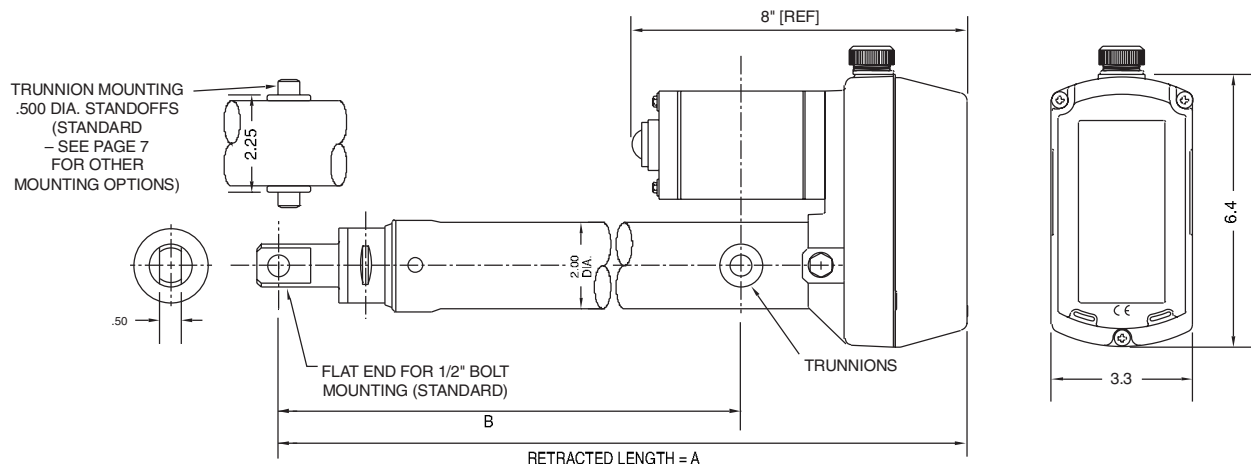

CC Linear Actuators feature precision ball screws for greater efficiency.

SENSOR OPTIONS

A variety of sensor options for stroke control may be selected to fit specific applications. See page 413 for all sensor details.

KEYED

CC Linear Actuators may be ordered with a feature that allows the actuator tube to extend (retract) without being connected to the load. The key also reduces torque in clevises. Contact Nook Engineering for ordering details.

When 110 VAC input voltage is required, a DC motor is supplied with a rectifier.

SENSOR OPTIONS

Nook sensor options are used to provide input to counters, PLCs, or other control systems.

POTENTIOMETER

The 10Kohm potentiometer provides a varying resistance in proportion to the travel. Potentiometers offer absolute position feedback regardless of the loss of power.

HALL EFFECT

The hall effect sensor provides pulses at the rate of 40 per inch of travel.

REED SWITCH (OPTIONAL)

The reed switch provides contact closures at the rate of 40 per inch of travel. Contact Nook Engineering for ordering details.

MOUNTING OPTIONS

CC Linear Actuators can be mounted with standard trunnions and clevis end. When double clevis mounting is required, an optional bracket is available.

3/4 SWIVEL BALL ENDS

1/2 BOLT TUBE MOUNTING BRACKET

3/4 BOLT HEAVY-DUTY TUBE MOUNTING BRACKET
